To understand the concept of various measures of central tendency and variation and their importance in business. 3. To understand the concept of probability, probability distributions and simulations in business world and decision making.
Subject Name -: E-Commerce Concepts Course Code -: 205	Upon successful completion of the course students will be able to: 1. Recognize the impact of Information and Communication technologies, especially of the Internet in business operations. 2. Recognize the fundamental principles of e-Business and e-Commerce. 3. Distinguish the role of Management in the context of e-Business and e-Commerce. 4. Explain the added value, risks and barriers in the adoption of e-Business and e-Commerce. 5. Examine applications of e-Commerce in relation to the applied strategic . 6. Develop and publish web pages using HTML5, CSS3 and Javascript . 7. Use tools and services of the internet in the development of a virtual e-commerce site
Subject Name-: RDBMS (Relational Database Management System) Course Code-: 301	1. Enables students to understand relational database concepts and transaction management concepts in database system. 2. Enables student to write PL/SQL programs that use: procedure, function, package, cursor and trigger.
Subject Name -: Data Structure Using C Course Code - :302	1. To understand different methods of organising large amounts of data. 2. To efficiently implement different data structure . 3. To efficiently implement solution for different problems. 4. To get more knowledge on C programming language

Subject Name :- Introduction to Operating System Course Code :- 303	<ol style="list-style-type: none"> 1. To know system programming. 2. To know services provided by operating system. 3. To know the Scheduling concepts
Subject Name: - Business Mathematics Course Code: - 304	<p>On successful completion of this course, student should be able to:</p> <ol style="list-style-type: none"> 1. define basic terms in the areas of business calculus and financial mathematics. 2. explain basic methods of business calculus, types and methods of interest account and their basic applications in practice,. 3. solve problems in the areas of business calculus, simple and compound interest account, use of compound interest account, loan and consumer credit. 4. discern effects of various types and methods of interest account. 5. connect acquired knowledge and skills with practical problems in economic practice
Subject Name:- Software Engineering Course Code:- 305	This course enables students to understand system concepts and its application in Software development.
Subject Name:- Object Oriented Programming Using C++ Course Code:- 401	<ol style="list-style-type: none"> 1. Acquire an understanding of basic object-oriented concepts and the issues involved in effective class design. 2. Enables student to write C++ programs that use: object-oriented concepts such as information hiding, constructors, destructors, inheritance.
Subject Name: Programming in Visual Basic Course Code: 402	<ol style="list-style-type: none"> 1. To learn properties and events, methods of controls and how to handle events of different controls. 2. To understand the use of active controls and how to design VB application. 3. To learn connectivity between VB and databases.
Subject Name : Computer Networking Course Code :- 403	<ol style="list-style-type: none"> 1. To know about computer network. 2. To understand different topologies used in networking 3. To learn different types of network. 4. To understanding the use of connecting device used in network.
Subject Name :- Enterprise Resource Planning and Management. Course Code -	<ol style="list-style-type: none"> 1. To know what is ERP. 2. To learn different ERP technologies.

:404	
Subject: - Human Resource Management Course Code:- 405	To acquaint the students with the Human Resource Management its different functions in an organization and the Human Resource Processes that are concerned with planning, motivating and developing suitable employees for the benefit of the organization.
Subject Name : Java Programming Course Code -: 501	1. To learn the basic concept of Java Programming. 2. To understand how to use programming in day to day applications.
Subject Name : Web Technologies Course Code -: 502	1. To know & understand concepts of internet programming. 2. To understand how to develop web based applications using PHP.
Subject Name : Dot Net Programming Course Code -: 503	1. This will introduce visual programming and event driven programming practically. 2. This will enhance applications development skill of the student.
Subject Name : Object Oriented Software Engineering Course Code -: 504	1. To Understand concept of system design using UML. 2. To understand system development through object oriented techniques.
Subject Name : Advanced Web Technologies Course Code -: 601	1. To know & understand concepts of internet programming. 2. To understand the concepts of XML and AJAX.
Subject Name : Advanced Java Course Code -: 602	1. To know the concept of Java Programming. 2. To understand how to use programming in day to day applications. 3. To develop programming logic.
Subject Name : Recent Trends in IT Course Code -: 603	1. To introduce upcoming trends in Information technology. 2. To study Eco friendly software development.
Subject Name : Software Testing Course Code -: 604	1. To know the concept of software testing. 2. To understand how to test bugs in software. 3. To develop programming logic.
