Alternate sources of energy and energy conservation measures

This is one of the types of non-conventional sources of energy. Sun is the free of cost source of energy on Earth. The main advantage is that it is a renewable, clean energy source. Solar power is also scalable. Solar energy can be used to provide heat, light, and other electricity-dependent needs in homes and buildings. The college is located in the Deccan plateau region of Maharashtra (Latt.: 18.65725; Long.:74.13765) which is very clean and with plenty of sunlight throughout the year. To save the cost on energy expenditure the institute has installed Photovoltaic cells or rooftop solar panels on the buildings and electricity generated is wheeled to the grid of electricity provider Maharashtra State Electricity Distribution Company Limited, a state government company. The details of the solar panel installed are as follows:
