2.5 Institute Infrastructure

2.5.1 Establishment

The building was established in 2008. The Building is a Reinforced Cement Concrete (RCC) framework building. **Overall the Infrastructure of the Building is excellent in terms of the Architecture Design and Green Building Design. The Premise covers quite a few of the requirements for a Green Habitat.**

2.5.2 Spatial Organisation

The overall ambience of the College is warm and inviting. The classrooms and other spaces have ample natural ventilation in the form of clear glass windows with fresh air ventilation. The architecture of the building is quite well designed. The colour palette not just helps the building to stand out but also provides an Institutional arena. It balances with the local architecture with the natural landscapes of huge coconut trees all around. The design emphasis on providing calmness to the built form and gradually merges with the serene landscape.

There are no false ceilings in the campus. The floor to floor height is for Ground floor it is 10' and other floors around 12'. There are no lifts in the premise. There are provisions for CCTV in addition to amenities such as library. There are 2 meters for college buildings. The room-wise details are mentioned below:

2.5.3 Fire Safety

When the building was constructed Fire fighting norms and permission from Chief Fire Officer was not in practice. However, the Institution has taken care for adequate fire safety measures to be adopted. Each floor has an open staircase without any barriers for fire safety measures. These staircases are free of any kind of storage or combustible material. The windows in each classroom are at a low height with fresh air and natural light thereby adding to ample ventilation throughout the day. The college should adopt additional fire safety practices such as fire hydrant and others. The current facilities are quite well maintained. There are adequate Fire extinguisher in the premise.

3. Green Audit

3.1 About the Green Audit

It is a systematic study of the aspects which make the Institution a sustainable and healthy premise for its inhabitants.

3.2 Analysis for the Green Audit

The procedure included detailed verification for the following:

Energy Audit

- Analysis of the Lights, Fans, AC, Equipment
- Renewable energy
- Scope for reducing the current energy bills if any
- Improvement in the thermal comfort of the campus

Water Audit

- Analysis of the current water consumption of campus
- Scope to include Rain water harvesting and Waste water treatment in campus

Waste Audit

- Current waste produced, its segregation and usage
- Strategies to be adopted for waste management and awareness

Environmental Audit

- Analysis of the current landscape + hardscape of campus
- Analysis of the flora and fauna of campus
- Strategies adopted at present to enhance vegetation
- Measures that can be adopted for ecological improvement of campus

3.3 Strategy adopted for conducting Green Audit

The strategies included data collection from admin department, actual inventory, investigation to check the operation and maintenance, analysis of the data collected and preparation of the Report.

3.4 Timeline of the activities for Green Audit

- 29 September 2021 – Initiation by the College to conduct Audit
- 13 October 2021 – On-site visit to the premise

Ecological (Environment) Audit

4. Ecological (Environmental) Audit

Environment is an essential part for human survival. We co-exist with the environment and it cannot be termed as a separate entity. The Ecological audit helps to understand the flora, fauna that exists and steps that can be taken to improve the same. To denote if there are problems related to sound in and around the surrounding. In terms of the carbon footprint it helps in keeping a tab on the eco-friendly habits incorporated by the inhabitants of the premise. Health today is the topmost priority, a general understanding of the initiatives undertaken along with sufficient hygiene practices adopted. Universal design is applicable to all built and unbuilt spaces. The premise needs to have facilities for students who are specially abled alike.

As part of our study we could state that the Institution has developed eco-friendly practices and sustainable solutions which are well reflected in the rich biodiversity of the Premises. Being situated near the city the appreciation space towards the main entrance provides a welcoming approach to the College.

4.1 Open Spaces

There is a beautiful balance of natural and open spaces in the premise and the open/vegetation spaces are balanced overall. The ground is used by students at present for sports as it is a Physical Education Institute. **There are provisions for natural plantations which have enhanced the beauty of the space.** There are a few Maintenance staff allotted for the open spaces and they have done an excellence job in terms of the duty allotted. The infrastructure committee too is involved in this process. The traditional tap and pipe facility is adopted for watering and the college has taken special provisions for the same. The spaces are watered daily in summer. **The efforts to maintain the existing space are commendable.**

4.2 Flora Audit

The above analysis shows the area occupied provides that a huge land area is occupied by the playground and garden. These are planted by students and staff on various occasions in premise and building surrounding. The trees constitute a **total of 39 varieties amounting to 345 numbers** in premise. . The landscape area has a variety of plantations as follows:

4.3 Green practices

We observed the following points during the Site investigation:

- The Institution uses fertilisers thereby making efforts to maintain and increase ecology. The ample vegetation provides shade thereby benefiting the users. The College has compost pits available in campus which are used to make manure and organic slurry which are used for the plantation. The quantity generated is sufficient and the use of chemical fertilizers is avoided.
- The NSS Team and Admin staffs have joined hands towards the upgrading of the premises from environmental view.
- There are sufficient Maintenance staff who manages the entire campus. Regular tap and water irrigation method is used for watering the garden twice a week.
- **One of its kind initiative of having climate control device as Automatic Weather Station (Rain gauge) which provides information to the local IMD station.**
- Ban on the use of plastic bags in the Premise.

4.4 Eco-friendly initiatives undertaken

The Institution has undertaken the following initiatives through **excellent efforts** towards save environment measures before pandemic. The NSS Department holds the nature club and various activities like tree plantation, nature cleanliness, visits to nearby flora and fauna are carried out.

4.5 Noise Audit

During the site visit **noise measurement** was done using scientific instruments and the results was 56.1 decibels which is good.

4.5.1 Macro level

On a macro level there are only open spaces on all sides, there are few commercial areas along the East side but as the distance is quite long there is minimal disturbance. However as the college is pretty close to the road there are vehicular disturbance to a certain level but quite minimal. **Overall the noise level is low and less noise Pollution as College falls under silent zone as per our analysis.**

4.5.2 Micro level

The college is has huge open space covered with greens which absorb the sound and help in keeping noise levels low and students, staff do not have any disturbance in academics majorly. However there is provision for staff parking which causes some noise. There is provision for staff parking which causes some noise. The college does not have generator and there is no sound problem caused due to the same. There are no particular equipments which cause any effect. **Overall the noise levels inside the premises are between moderate and low which is a good approach.**

4.6 Village adoption scheme the community development approach

The college has done highly commendable work in terms of rural and overall development. The concept of Community development was undertaken as part of the "Village Adoption Scheme" to create awareness about Education, Health and Environment among the stakeholders of the college by adopting the nearby villages through NSS and conducting activities related to economy, recent trends in market, education, remedial coaching classes, bridge course, General Awareness about Health and Hygiene as well as also creating awareness about seasonal health issue like Malaria, typhoid, cold, flu, COVID, etc. and in case of Environment education many faculty members have even planted trees in their adopted villages and also creating awareness about environment conservation.

The various community development programmes conducted are as follows:

4. *Blood Donation Camp*
5. *Food Kit Distribution Programme to the neighbourhood community*
6. *Financial Aid given to the students of economically weaker section.*

4.7 Carbon Footprint Audit

4.7.1 Eco-friendly Commuting Practices

The premise is located in rural area and students come from nearby villages as follows.

Sr.No.	Name of the Village
1	Kasari
2	Nimgaon
3	Vitthalwadi
4	Kondhapuri
5	Sanaswadi
6	Koregaon Bhima

4.7.2 Heat Island Reduction

The Institution has adopted the following practices which are yielding positive results in terms of Urban Heat Island Effect which refers to increase in temperature of the surrounding because of ineffective strategies.

- Exposed roof areas - The terrace area is which is painted in white which reflects the heat, thereby maintaining the Internal temperature in control.
- Exposed non-roof hardscape areas - There is a pathway on all sides of the premises. There are huge open spaces with lush greens these help in maintaining the micro climate of the surrounding to a major extent.

During the site visit **temperature measurement** was done using scientific instruments and Semi-open passage area had temperature of 28.7⁰C, Internal enclosed space had a temperature of 30.4⁰C and open Terrace area had a temperature of 32.9⁰C which are good.

The staff had informed they hardly have the need to use fans and lights in the premise hence the numbers of lights and fans are minimal which is an extremely good practice.

4.7.3 No Outdoor Light Pollution

The college uses the compound lights occasionally for some functions and these are not upward looking there not causing light pollution.

4.8 Health & Hygiene Audit

4.8.1 Smoke and dust Exposure

As per the site investigation the following analysis has a positive impact on premises.

- The Institution is a tobacco and smoke free campus which helps in adapting to a Healthy Institution
- There is a huge open space in premise which is allowed for social gathering among students. It is also used for sports, outdoor games, annual days, cultural functions.
- The open space is used for physical activities by the students.

- The vehicles parked in the premise do not cause any dust related issues.
- The college received Government of Maharashtra's *Rashtrapita Mahatma Gandhi Vyasanmukt Award* for the year 2013 (*Award for Freedom for Addiction*).

A major portion of garbage is dumped in pits a small percentage of the garbage in premise is burnt, these practices should be avoided.

4.8.2 Hygiene

- There is washroom facility including hand wash facility and drinking water facility, further it was found that the hygiene of toilet areas is well maintained.
- The entire premise is cleaned on a daily basis and the college takes regular initiatives to maintain hygiene.
- There is designated staff as Hygiene specialist who keeps a regular check about the operation and maintenance of the toilet areas and the equipments, lights and all facilities on each floor.
- The Food waste and other refuse are removed periodically from food handling areas to avoid accumulation. The areas of water tanks in site on ground floor are clean and no mosquito breeding spots are there.
- The waste collected in campus be accumulated at a place used a dumping pit and some portion is burnt.

4.9 Universal Campus

As per World Report on Disability, 2011 there are 180 million approx. Persons with Disabilities that makes it 15% of total population of India.

The college has provisions of ramp and handrails along staircase in the premise, thereby making it user friendly for the specially abled students. The design of the premises is appropriate for access with passages and corridors being sufficiently wide. The single loaded corridors are safe from fire safety as there are staircases and fire extinguisher is available on ground floor.

4.10.4 Do you participate in such events?

Figure 8: Green awareness practices in College

The students, staff (**almost 96%**) of the responses confirmed their participation.

4.10.6 What according to you are the positive steps taken by the Institute towards Green Building/ Good maintenance?

We have listed some of the key responses below.

- Daily Cleanliness in college
- **There are a lot of trees on the college grounds and various events are organized.**
- **Plantation of trees, put dustbins for wastes materials, create programs for awareness of environment.**
- **Plant a tree every month**
- **Efficient use of energy, water and other resources. Use of renewable energy, such as solar energy.**
- To encourage every student to plant one tree in campus and maintain three years, after that to give responsibility to new comer students in college they can maintain.
- By planting plants in college surrounding
- They keep very good maintenance

4.6 Recommendations for a Sustainable Habitat

a) Promote the use of Eco-friendly vehicles

There can be provision for cycle and battery operated vehicles/ low emission vehicles such as electrically driven vehicles parking in open space along with battery charge points, this would inspire students to change mode of transportation and adopt sustainable practices.

b) Low VOC Paints and Adhesives

Whenever the College undergoes repairs or renovations there should be use of materials with low emissions so as to reduce the adverse health impacts on workmen and the students occupying the space thereafter.

c) Universal Toilet

There should be minimum 1 toilet for the specially abled people as per guidelines

Principal
S.S.Dhamdhare Arts & Commerce College
Talegaon Dhamdhare, Tal. Shirur.
Dist. Pune-412 208

prescribed by National Building Code 2016 with size being minimum or more than 1.5m x 1.5m

d) Avoid burning of waste

The waste produced in campus should not be burned as it is dangerous towards health of students and staff

e) Scientific names/ Name plates

There can be names plates for each plant and tree in premises with regular and scientific name to increase awareness.

f) Resting places

There should be increased provision for resting places in premises in outdoor

g) Environmental awareness

There can be various art works on compound wall giving message of saving environment through the joint efforts of the students and staff thereby making the student socially and environmentally responsible citizen.

5. Waste Audit

Waste is an inevitable part of our lives. Over the years as the awareness about waste management techniques has given a rise to rethink how the waste can be avoided from being sent to the landfills. The audit provides an approximation of the types of waste generated, location of waste collections, disposal techniques used, waste segregation methodologies adopted, waste management strategies that are and implemented in addition to the newer ways the can be adopted aiming to make the premise clean and sustainable. Here sustainable refers to a broader aspect to analyse whether the current techniques are having positive or negative effect on the stakeholders of the premises.

5.1 Waste produced

5.1.1 Types and disposal of waste in Premise

The types of waste collected in the campus are as follows, these are separated before processing and not handed over to the local Corporation.

S. No.	Type of waste	Source and quantity	Current Disposal method	Can be treated/ recycled?	Methodology
1	Solid waste	Toilets–Biodegradable waste of 10kg per week	Led in the storm water drains	Yes	TREATED - Small biogas plant can be proposed in open space
2	E-waste	Computers - Non-biodegradable waste as per the annual year usage	Handed over to vendors if necessary	Yes	RECYCLED - Can be given to e-waste companies
3	Liquid waste	Toilets and laboratories – Around 25 litres per week	Led in the storm water drains	Yes	Connected to local drainage
4	Dry waste in form of leaves	Open space & plantations, papers - Non biodegradable waste of 4kg per week	Composting	Yes	Can continue with the same practice
5	Organic waste	Canteen - Biodegradable waste from Canteen of 0.5kg per week		Yes	Can continue with the same practice

Table 8: Summary of the types of waste produced in the premises

There is no hazardous, medical and unused equipment waste generated in campus.

5.2 Waste handling

Quantification wise as per Interview and survey it was found that the Dry leaves and organic waste collected is approximately 4.5 kg per week. The liquid waste is approximately 25 litres per week. The waste produced on campus is segregated. It is collected on a daily basis and liquid waste is led into drain gut the dry organic waste is put into compost pits.

5.3 Waste management

The college reuses the papers. It was informed that after every 3 years the Paper waste such as journals, practical Reports were given to raddi. Ample measures are taken to maintain hygiene. No smell problem or health related issues due to the waste are there. There are adequate numbers of bins present in all parts of building. The waste does not pollute the ground or surface water. There is no problem of air pollution from waste as informed. The wastes from toilets are discharged to main drains through underground covered channels (Safety Tanks) thus avoiding any incident. There is provision for Sanitary Napkin Vending in the premise in Ladies Wash Room for proper & hygienic disposal of sanitary napkins. The college practices out 'Swachha Bharat Abhiyan' on the college premises.

5.4 Survey Results

An online survey was conducted to analyse the student and staff views about the Waste management practices adopted in College, following is the result received.

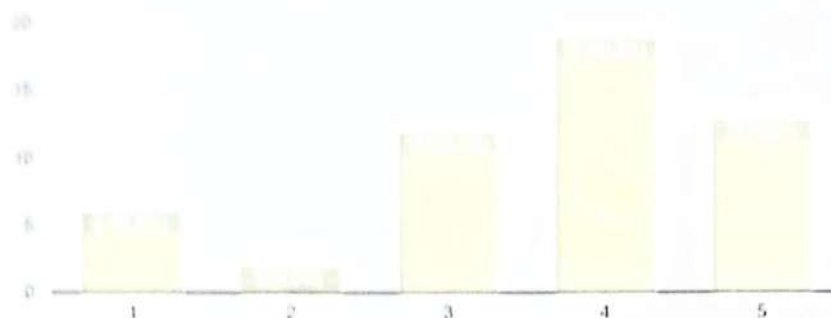

Figure 12: Waste management practices in College

The students, staff (**almost 37%**) of responses found the practices to be very good.

5.5 Recommendations for a Sustainable Habitat

The following practice can be adopted for further up gradation.

a) Zero Waste

The college can undertake a zero organic waste protocol. The following practices can be adopted as part of the same.

- The food waste generated by the students and staffs are taken by them to their own home, so that, minimum waste is generated inside the premises.
- The organic waste generated in the canteen is used as feed for a biogas plant and the biogas is used as fuel in college canteen.
- Vegetable waste and other leaf litters can be used to fed in the vermi-compost pit and the resulting vermin-cast is used as manure in the garden.
- The chemicals from the laboratories be disposed in a sealed tank along with water, so that the chemicals undergo neutralization with the water.

As part of the above there will be a requirement for a Biogas plant, vermin-compost pit, awareness signages.

Water Audit

Background reference image Vlad Chetan on pexels

6. Water Audit

Water is one of the basic needs. Pure drinking water is a resource which needs to be preserved efficiently. Water audit helps to identify the sources of water consumption, the water requirement by the campus met by these sources. The points and effective usage of without any wastage. Understanding the techniques which are best suited to the site to increase water conservation in terms of awareness and practice.

6.1 Water availability and consumption

6.1.1 Sources of Primary water supply

The main source of water is through well and Rain water harvesting. The College does not require water from the Local Municipality. The total water consumption through the tanks on site is as follows:

S. No.	Type of tank	Nos.	Location	Capacity in litres
1	Water tank	1	Near parking shed	20,000
2	Water storage tank	4	Sintex tank	4,000
3	Water tank	1	Near student - Staff toilets, and wash basins	5,000
Total				29,000

Table 9: Tanks in the premise

6.1.2 Sources of Secondary water supply

- Total 1 Bore well is available on the site as underground water facility with daily water being pumped for using submersible pump of 1.5 HP pump each for 5 hours a day. The actual depth of the well is 300 ft. On a daily basis nearly 3,000 to 6,000 litres of water is pumped for usage depending on the need.
- Rainwater harvesting quantity details – **The Rain water harvesting is done through the ground water recharging and upgrading the water quantity for bore well recharging.** The rainwater collected on terraces, roofs, balconies, and on grounds is smartly directed to the garden area and underground storage area.

6.1.3 Water consumption through RO

There is provision for 1 RO filter water system which consumes connected to the Water cooler. These are connected to the pump and drinking water tanks. Even though there is provision for well, tanks the college has to utilise external water tanks for use.

6.2 Water requirement

The main areas of water requirement and type of usage is as follows

- **Drinking water** – General water required for drinking purpose using around 150 litres of water through Aquaguard available in the premise. The college gets in bulk the RO water cans from outside.
- **Toilet blocks and practical laboratories** – General usage by occupants in toilets, urinals, bathrooms, wash basins using approx. 250 litres of water daily and
- **Cleaning of the premises** – The entire Institution is very well maintained with respect to hygiene and cleaning is one of the major uses of water requirement. **The toilet areas are cleaned daily.**
- **Garden and surrounding open space** – Cleaning, watering the plants requires approximately more than 1,000 litres of water on alternate days in winter season and about 2-3 times a day in summer season on a regular climate day it is watered 3 days a week and in rainy season it is dependent on the monsoon showers.

6.3 Areas of water usage

Based on the inventory done and data shared by the staff it was found that the premise has a total of **2 lavatories, 2 urinals, 4 wash basins, 30 taps (including outdoors), 2 flush tanks.**

As per the data shared by the College, it was noted that there is wastage of water to a certain extent in the form of Cleanliness of toilets and laboratories.

6.4 Site investigation about water management.

- There is no water leakage in the entire premise, the pipes well maintained with **extremely good and well maintained hygiene.**
- The premise has an efficient water management in terms of operations and maintenance. The toilets were kept very tidy and are cleaned daily.
- **The waste water does not mix with ground water.**
- There is sufficient number of taps in the premise.

6.5 Survey Results

An online survey was conducted to analyse the student and staff views about the Water management practices adopted in College, following is the result received.

Figure 13: Water management practices in College

The students, staff (**almost 42%**) of the responses found the practices to be excellent.

6.6 Results of On-site audit measurements

6.7 Recommendations for a Sustainable Habitat

Below mentioned are few suggestions for better water management practices in the premise.

a) Universal Toilet

At least 1 toilet should be made for specially abled as per universal design norms.

b) Toilet flush system

Replace the existing single flush cisterns with dual flush, if possible to include waterless urinals or e-toilets.

c) Waste water from toilets

This should be collected and a waste water treatment plant can be installed in the open space wherein this water can be treated and reused for gardening and toilet flushing.

d) Signages

Message about avoiding water wastage should be placed at appropriate locations.

7. Energy Audit

7.1 Sources of Energy consumption

The premise uses following sources of energy consumption.

7.1.1 Primary sources

1. **Electrical (Metered)** – Light, Fans, AC, Equipments, Pumps consumed approximately per month (average) 436 units in 2019, 889 units in 2020 and 1,238 units in 2021.

7.1.2 Secondary sources

1. **UPS** – There is 36 UPS in the premise for main admin department.
2. **Generator** – There is 1 Diesel Generator but it is not in use.
3. **Batteries** – There are 4 numbers of batteries in premise.

7.2 Site investigation analysis

The Site investigation observations and interviews with the Maintenance staff, Electrical department in charge are summarised below:

- The **switch-off drills are practised at present**, the inbuilt power saving mode in every Comp is functioning.
- There are **no Ultra-violet lights and any other harmful lights used** in the premise.
- All class rooms and office is **ventilated using natural light**.
- **Smart monitors to save power**.

7.3 Actual Electrical Consumption as per Bills

The admin department had shared the bills for Meter and it is the main source of energy supply. The supplier is Maharashtra State Electricity Distribution Limited. The type of supply is **073/ LT-X B 1 0-20KW Pub service**. The details of unit consumption meter wise are as follows:

7.5 Calculated Electrical Consumption as per Inventory

The electricity bills provide actual consumption data. The following is the calculated consumption. It is done to understand the percentage of energy usage in the premises by various applications. It is based on the inventory collected and interviews with the staff. The additional data such as wattage is taken from market research. In terms of electrical consumption, the main sources are lights, fans, ac, equipment. The inventory and data collection for sources of energy consumed in the premise is summarised in the following sections.

Note: The following analysis is combined for entire premise taking into considerations the duration before pandemic to understand the consumption pattern as post pandemic the premise is used only for a few hours.

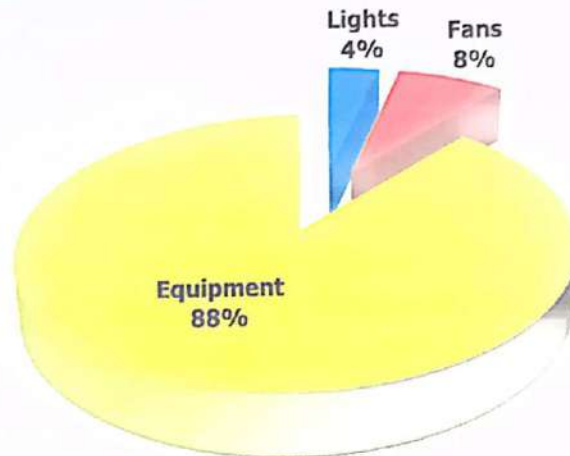

Figure 15: Summary of the Calculated Electrical Consumption as per inventory

The above graph shows that Equipment consumes 88% followed by Fans at 8% and Lights consume 4% of the total calculated electrical energy.

UPS (when used for electrical consumption else it is a battery backup and does not require electricity as an equipment) are also one of the equipment but are excluded in this calculation. The pump for the well is common for the School and College hence it is excluded for the calculation purpose.

7.8.2 Floor-wise consumption analysis

The energy consumption of Equipment is **38,450 kWh** of energy; the following graph shows the floor wise consumption. This section analysis constitutes all buildings as a single entity.

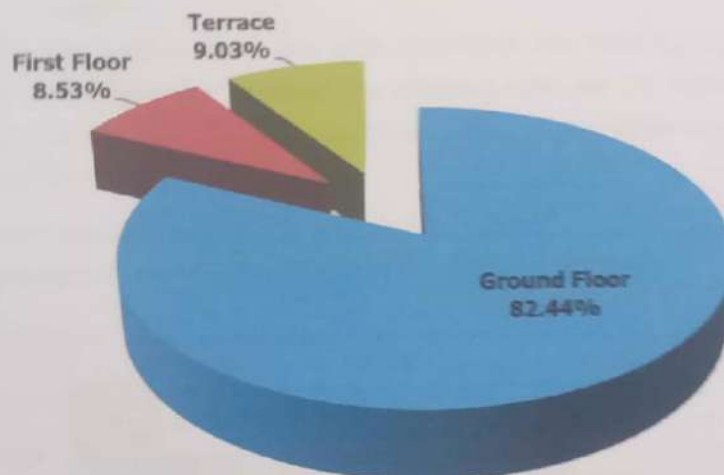

Figure 20: Energy consumed by Equipment floor wise

The above analysis shows the equipment in the **Ground floor consumes the highest amount of energy of 31,696 kWh at 82%** whereas the **Terrace floor consumes 3,472 kWh at 9.03%** and the least energy is consumed by the **First floor floor consumes 3,282 kWh at 8.53%**

7.8.3 Site investigation observations

7.18 Non-conventional from First @ Smart Institute Mahabaleshwar

Over the time energy efficient appliances have been a boon not only by the energy saving parameters they allow to but also the eco friendly value it adds to the world. The Institution such as schools and colleges are the best way to implement these initiatives. It creates awareness among the students at a young age. The initiatives also act as a symbol and representation of being an energy efficient person.

Following the analysis we found one scope of the suggestions which can be implemented for an energy efficient institution. This would help in reduction of the current electrical consumption by a major percentage.

7.18.1 Lights

The current light analysis shows that LEDs (Tubelights and Panel lights) occupy 12 nos. of the total lights in the premises. The remaining lights are CFL lights consuming 25W when in use and these should be replaced with LED lights which consume on an average 16-20W when in use.

The following graph shows a comparison of the current consumption and consumption of all 4 Non-LED Tubelights on all floors if replaced with LED lights.

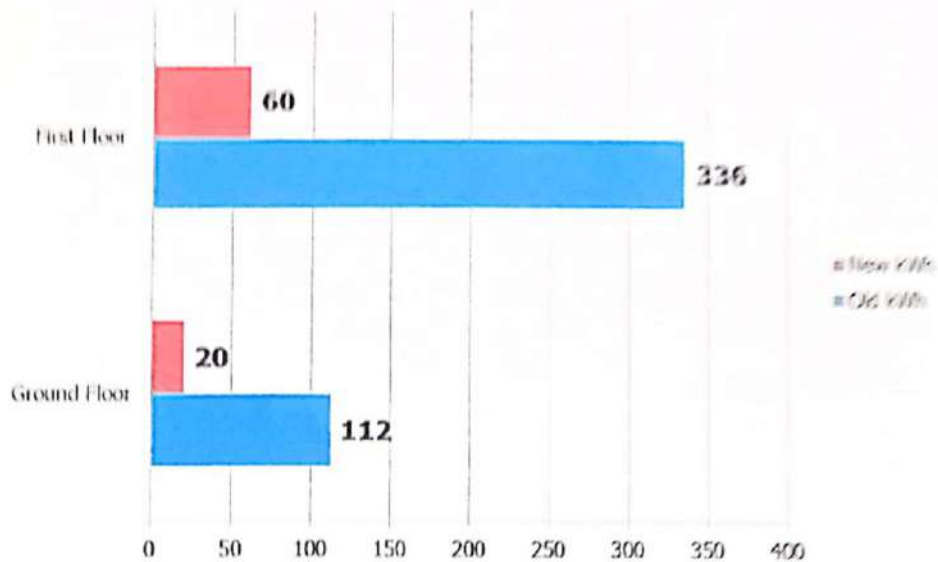

Figure 21: Analysis of current and new lights

The above analysis shows reduction of average of **82% reduction** in energy consumption if replaced with energy efficient appliance.

7.9.2 Fans

The current Fans are in proper working conditions and maintained well. The ceiling fans are in more quantity and consume at least 60W when in use. These should be replaced with energy efficient fans consuming 32W when in use.

The following graph shows a comparison of the current consumption and consumption of all **29 ceiling fans on all floors** if replaced with star rated appliance.

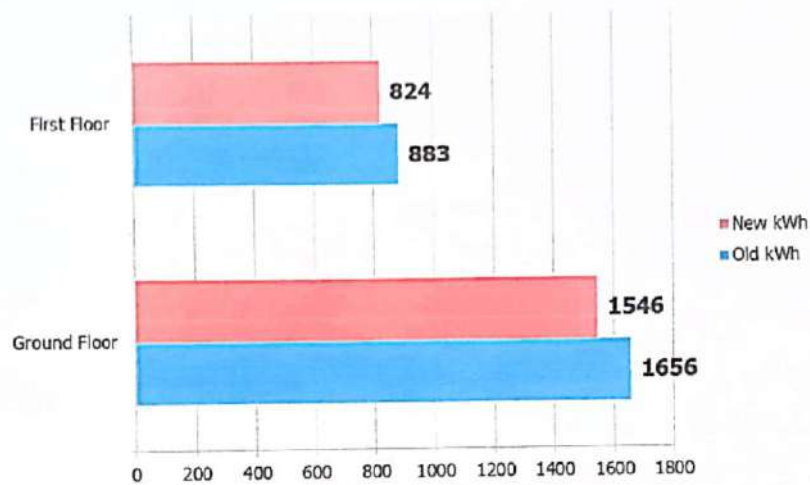

Figure 22: Analysis of current and new fans

The above analysis shows reduction of average of **47% reduction** in energy consumption if replaced with energy efficient appliance.

It will be suggested to either replace these now if College can have certain plans else the replacement can be done when fans get damaged or are not in working condition.

7.9.3 Equipment

Among all equipment the computers are in maximum number and suggested to be replaced with laptops as this would be energy efficient. A normal computer consumes on an average 250W and it is to be connected all time when it has to be used. On the contrary a laptop consumes 40W and has a battery backup which lasts up to 4 hours.

The following table shows a comparison of the current consumption and consumption of the **36 desktop computers** if replaced with laptops.

Figure 23: Analysis of current computers and new laptops

The above analysis shows reduction of average of **84% reduction** in energy consumption if replaced with energy efficient appliance.

It will be suggested to either replace these now if College can have certain plans else the replacement can be done when the devices get damaged or are not in working condition.

8. Towards a Healthy & Sustainable Institution

8.1 Inputs by Greenvio Solutions

Based on the analysis of the study of premises in addition to the recommendations provided in each section of Ecological, Water, Waste and Energy Audit the College can adopt the following strategies towards a Healthy and Sustainable Institution practices.

- a) **Cutlery in the Canteen** – The regular plastic and steel plates, spoons used in Canteen can be replaced with eco-friendly and organic leaves, paper straw, disposable plates, edible spoons and tables made out of sugarcane waste or bamboo. This will be first of its kind initiative to be adopted and practiced thus also inculcating the healthy practices in students.
- b) **Waste via** – Stepping up a little further an initiative can be undertaken wherein College can tie up with an organisation and students can be encouraged to collect dry waste and electronic waste such as newspapers, old computers and others and hand over to organisation on a weekly or monthly basis thereby making a waste reduction approach in the community. This has benefits such as awareness, eco-friendly habits in becoming a responsible citizen.
- c) **Signages** – In addition to the signages being in regular language there can be additional signages in braille language for the specially abled students.
- d) **Additional fire safety** - The premises at present has only Fire extinguisher as the safety practice but additional fire safety measures should be adopted such as Hose reel, signages, fire-fighting tank, fire alarm and sprinkler system. There should be fire extinguisher minimum two per floor.

8.2 Survey Results

An online survey was conducted to analyse the student and staff views about what changes according to you can be undertaken for Green audit improvement in College premise and activity, some of the key responses are listed below. Whereas many responses stated there were no changes requires because the present

processes are good.

- *As the text says the daily plastic waste*
- For green audit we take to decision that all plastic will be collected and sent to vidyan ashram palak.
- The college should go to different villages and organize this program
- Webinars
- Any guest will come in college, we can get a tree planted by them.
- No changes (all is good)

However, it should be noted that the College has taken up multiple initiatives and because of Pandemic the students have not practically visited the campus so many of these points are not mandatory at the moment.

Visit to Historical place and Cleanliness Activity

On 11/8/2017, the historic Victory Column (Vijayastambha) at Koregaon Bhima was cleaned by the NSS Volunteers. In 1818, there was a war between the British and the Marathas. The British were victorious in this war. On the side of the British, Mahar Faltani had achieved great feats. Some of the soldiers of this battalion had died in this war. A Vijayastambha was built here in his memory. 98 (56 boys, 42 girls) volunteers of the National Service Scheme Department cleaned this historic Victory Pillar and its surroundings.

Visit to Historical place and Cleanliness Activity

On 11/8/2017, the historic Victory Column (Vijayastambha) at Koregaon Bhima was cleaned by the NSS Volunteers. In 1818, there was a war between the British and the Marathas. The British were victorious in this war. On the side of the British, Mahar Faltani had achieved great feats. Some of the soldiers of this battalion had died in this war. A Vijayastambha was built here in his memory. 98 (56 boys, 42 girls) volunteers of the National Service Scheme Department cleaned this historic Victory Pillar and its surroundings.

Report or program outcome	<p>Department of Geography and Rotary Club, Shikrapur launched “Plastic Free Environment Campaign” at college. An action plan was prepared on how to clean the college and school premises. On this occasion, Mr. Vinod Bodhankar, Environment expert from Pune, gave information about waste management. As plastic is a non-degradable material, it is dangerous to animals, humans, pets, fishes and it is not destroyed as it is thrown on the ground. For this, what is the responsibility and role of each element in the society.</p>

Plastic Free Environment Campaign

Department of Geography and Rotary Club, Shikrapur launched “Plastic Free Environment Campaign” at college. An action plan was prepared on how to clean the college and school premises. On this occasion, Mr. Vinod Bodhankar, Environment expert from Pune, gave information about waste management. As plastic is a non-degradable material, it is dangerous to animals, humans, pets, fishes and it is not destroyed as it is thrown on the ground. For this, what is the responsibility and role of each element in the society.

To,

District Collector
Pune

Subject: Identification of villages under the UBA program.

Dear Sir

Ministry of Human Resources Development (MHRD), Government of India has launched the national program called Unnat Bharat Abhiyan (UBA), with the vision to involve professional and higher educational institutions in the development process of rural areas in the country to achieve sustainable development and better quality of life. Indian Institute of Technology, Hauz Khas, New Delhi has been designated to be the National Coordinating Institute by the Ministry.

Our Institution/ University/ college/ (S.P.M.'s, Sahebrao Shankarrao Dhamdhare Arts and Commerce College, Talegaon Dhamdhare, Tal-Shirur, Dist-Pune 412208, AISHE Code:- C-41766) has agreed to participate in UBA as a Participating Institute (PI). Dr. Ravindra Sudam Bhagat, Mob No. 9763440568, has been duly authorized in this regard from our side to carry on the activities of UBA in our organization as Project Coordinator.

Under the UBA program every Participating Institute is to adopt a cluster of five villages in consultation with the Districts Collector. This is to bring to your kind notice that we have proposed the following villages in the district (Pune).

1. Darekarwadi
2. Vitthalwadi
3. Takali Bhima
4. Talegaon Dhamdhare
5. Dhanore

In view of the above the Project Coordinator may contact your officer for the purpose. We request you to please help and cooperate in the matter.

With regards

Your Sincerely

Dear Sir/ Madam,

As you may be aware, Unnat Bharat Abhiyan (UBA) is a flagship program of MHRD, Government of India to involve higher education institutions of the country for indigenous development of self-sufficient and sustainable village clusters for inclusive India. As of now, 750 higher educations have been selected under the UBA project. With the intention of enriching rural India, these selected Institutions are expected to customize the available technologies and develop new technologies, as per the local needs and also improve the implementation of existing Government programs.

It is envisaged that most of the higher education institutions of the country will participate in UBA and help in inclusive development of villages in collaboration with district authorities through social, managerial and technological interventions through their faculty and students also. In the recently concluded National Conference of Vice-Chancellors and Directors, it was resolved that all the Higher Educational Institutes would associate themselves actively in implementing Unnat Bharat Abhiyan.

The second phase of the process of selection of institutions under Unnat Bharat Abhiyan has commenced w.e.f 1st September, 2018.

In this regard, you are requested to actively participate and register on UBA website and make the programme successful. The Advertisement in this regard is enclosed, the important details which are required for enrolling are provided below along with the website address.

Opening date of Portal for Registration: 1st September, 2018 at 10:00 am
Closing date of Portal for Registration: 20th September, 2018 till 05:00 pm.
